Creative and self-taught programmer, capable of solving real-world problems through technology, with experience working in startups and as a freelancer. I have advanced knowledge in frontend development, working with technologies like React, TypeScript, Next.js, and TailwindCSS, as well as strong communication and teamwork skills demonstrated during my experience at No Country.

Work Experience

Frontend Developer   *TPEOficial*   aug 2024 – Present
SaaS| Link   Spain

I am currently working as a Frontend Developer at TPEOficial, a startup that provides software services and AI tools. My responsibilities include frontend development, email creation, and contributing creative ideas, alongside a strong and collaborative team. **Technologies**: React, Tailwind, Astro, CSS, TypeScript.

Frontend Developer   *No country*   jul. 2024 – aug. 2024
Software | Link   Argentina

Project in which my teamwork, communication, and programming skills were put to the test. I participated in creating an MVP from scratch, developing the web styling and data structure. I worked as part of a team in backend development, QA, design, and frontend, actively reviewing and maintaining the code. I attended daily meetings and explored new technologies to optimize the project.
Technologies used: Frontend: React, TailwindCSS. Backend: Express, Prisma.

Web Developer   *Mens house barber*   apr. 2023 – jul. 2023
Barber shop | Link   Junin, Buenos Aires

I designed and developed a booking system from scratch for a barber, featuring user authentication and an admin panel. This web application helped optimize the manager's workload and increased the speed of the booking process. Additionally, it improved the user experience with its responsive design.
Technologies used: React, Tailwind, Next.js, Firebase, and CSS.

Education and Certificates

Self-taught: My main academic education.   2022 – Present
As a self-taught Jr. Frontend Developer, I have mastered key tools like React, TypeScript, Next.js, and TailwindCSS. I have built projects that apply what I've learned and allow me to follow best practices, creating efficient, functional interfaces and optimizing performance in modern web applications.

Skills

Languages and Technologies**:** React, Next.js, Tailwind, TypeScript, JavaScript, HTML, CSS, Git, Firebase, Sass.
